Basic Information

Zhou Xiaowei

Birth: Nov. 1991 **English Skill:** CET-6

Tel: +86 15684737697 **E-mail:** zhouxiaowei1120@163.com

Contact Address: No. 238 Songling Road, Laoshan District, Qingdao, China

Education

Ocean University of China (985&211 Project) Qingdao, China

Master of Engineering in Computer Application Technology Sep. 2014-Jun. 2017

(Postgraduate Recommendation)

Overall GPA: 88.37/100 (Rank: 5/56)

Ocean University of China (985&211 Project) Qingdao, China

Bachelor of Engineering in Computer Science and Technology Sep. 2010-Jun. 2014

Overall GPA: 87.53/100 (Rank: 2/33)

Research Projects

- **Sep. 2015-Now Surface height map estimation from single image based on deep learning (National Natural Science Foundation of China (NSFC))**

  Description: Proposed a novel method based on convolutional neural networks (CNNs) for estimating the height map from a single image, without using any other equipments or extra prior knowledge of the image contents.

  Platform: Linux、Caffe

  Duty: Finished this task by myself. Including: project design, model optimation, algorithm implementation.

- **May 2015-Jun. 2015 Automatic object recognition system (life-long learning) (National College Student Intelligent Design Competition)**

  Description: Extracting features by using Decaf, then training online learning SVM by using the features and recognizing the image, correcting the recognized results artificially by using DTW language model.

  Platform: Windows、Matlab、Caffe

  Duty: Speech recognizing, building and integrating the whole system, writing document.

- **Mar. 2014-May 2014 Research of Tsunami Personnel Evacuation (Young Teacher Foundation of Ocean University of China)**

  Description: The project is based on the tsunami simulation data generated by the Numerical model of COMCOT and high resolution remote sensing maps obtained by remote sensing satellites; extracting road network from the map by MapInfo tools; solving the shortest path for crowd evacuation by Dijkstra algorithm; finally establishing a tsunami personnel evacuation plan.

  Platform: Windows、C++

  Duty: Project design & algorithm implementation of personnel evacuation. Including: estimation of population distribution, the determination of tsunami flooded scoping, the selection of shelters, traffic capacity analysis, solving the shortest path.

- **Jun. 2012-Jun. 2013 Intelligent Monitor System Based on Vehicle (Student Research Developing Program of Ocean University of China)**

Description: The system is used for monitoring illegal behavior of the vehicle and detecting the congestion degree of roads.

Platform：Windows、C++

Duty： Video capture and preprocess. Open reply of project approval, medium-term project inspection, final project measurement

·Honors & Awards ·

- **3rd Prize of "Huawei Cup" Intelligent Design Competition for Chinese University students 2015**
- **First-class Academic Scholarship of Ocean University of China 2015**
- **Outstanding Graduate of Shandong Province 2014**
- **Excellent Student of Shandong Province 2014**
- Outstanding Scholarship for New Graduate Student 2014
- **National Endeavor Fellowship (Three times) 2011-2013**
- 3rd Prize of 13th "Challenge Cup" College Student Curricular Academic Science and Technology Works Competition of Ocean University of China 2013
- 3rd Prize of 3rd "Lucent Cup" Technology and Practice Competition 2013
- **1st Prize in Shandong Province of China Undergraduate Mathematical Contest in Modeling 2012**
- 3rd Prize of "Huawei Cup" Programming Competition of Ocean University of China 2012
- **3rd Prize in Shandong Province of "Lanqiao Cup" National Software Professionals Design and Entrepreneurship Competition 2012**

·Activities & Skills ·

Volunteer: Intelligent Data Analysis Seminar (IDAS 2014), Vision and Learning Seminar (VALSE2014), Chinese Association for Artificial Intelligence Expert Rostrum of Pattern Recognition. Technical Committee on Computer Vision, China Computer Federation going into University. Mid-term examination review of International S&T Cooperation Program of China in Qingdao.

Organizer: Machine learning reading group, Machine learning seminar, Intelligent Data Analysis Seminar (IDAS 2015).

Skills: Foundation of machine learning, deep learning, and image processing, foundation of mathematics, programming of C/C++, python, matlab, deep learning tools Caffe.

Practical activity: Teaching assistant in Experiments of Introduction to Computer Science and Technology. Severs administrator of vision lab of OUC. Part-time counsellor of OUC. Monitor of class for 5 years.
